

## Thanks for downloading my Tiny Ships pack!

You are free to do anything you want with it, except resell it.

To [Unity](#) users: I have **sliced** the sprites, added **animators** and colliders for your convenience. Enjoy!

All ships have an idle state. Some ships have all 3 states: **idle, move and attack**. There's an extra space of 1 pixel between frames (right and bottom), so **consider the 1 pixel padding if you're going to slice the frames yourself** in another engine.

### tinyShip1

Frame size: 24x27, Padding X: 1, States: idle, attack, move

### tinyShip2

This ship has a melee attack (spikes) that requires it to get closer to the enemy.

Frame size: 34x36, Padding X: 1, States: attack, idle, move

### tinyShip3

I thought this ship could be a tiny, cute police cruiser.

Frame size: 26x27, Padding X: 1, States: move, idle
